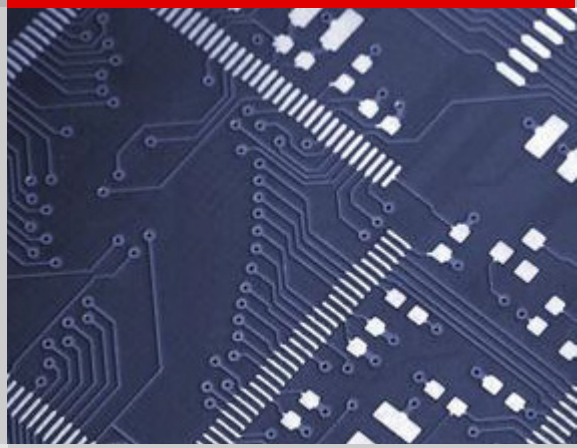
Anton Paar



Data management with Anton Paar SoftPrint

Transfer of measuring data to a PC with the free-of-charge Excel Add-In Anton Paar SoftPrint

Keep a close watch over your valuable measuring results

Anton Paar SoftPrint is a program for transferring measuring results to a PC and saving them immediately upon termination of the measurement. This free-of-charge Excel Add-In can be used in combination with most Anton Paar measuring instruments and combined systems. Data can be stored as a Microsoft Excel file.

The way to successful data storage in 12 easy-to-follow steps

1. To install Anton Paar SoftPrint, download the instruction manual and the program from the Anton Paar website.
2. Select the right cable for data transfer. Anton Paar SoftPrint will tell you which cable and instrument COM port to use.
3. Connect the cable to your instrument COM port.
4. Connect the cable to your PC COM port.
5. Start Anton Paar SoftPrint.
6. Select a file name and path.
7. Make sure the correct device is chosen.
8. Check and match the communication settings of PC and instrument.
9. Check and select correct instrument settings, e.g. set "print" to "printer".
10. Within one Excel instance, close all other Excel files while recording measurement data.
11. For printing data from the instrument data storage press "print" (where applicable).
12. Start a measurement knowing that your data are stored safely.

Good to know

Sheet protections ensures that data will not be accidentally deleted or modified, at the same time allowing data evaluation at a later stage.

To stop the data collection, simply click on "AP-SoftPrint" in the menu bar and select "Stop Data Collection".

Multisided applicability

Use Anton Paar SoftPrint for stand-alone instruments as well as for instrument combinations.
